

## CONVENIENT AND EASY TO USE

Equine**POWER** is a cool energy **Omega-3** supplement designed to be fed to horses along with good quality hay, grain, vitamin and mineral supplements.

### DIRECTIONS FOR USE :

Gradually introduce this supplement into your horse's diet over a 3 week period.

Class of Horse	Supplement to Add
Foal	125-150g per day
Yearling to 3 Year Old	250-500g per day
Light Working Horse	125-250g per day
Hard Working Horse	250-500g per day
Lactating Mare	250-500g per day
Breeding Stallion	250-500g per day
Senior Horse	500-1000g per day

1 scoop (included in package) = 250 grams

“We have seen amazing results. Their coats just look great and have tons of gloss. People at the barn think we spray them with show sheen but we don't!”

*Cassie Bolingbroke & Arliss Thorsteinson

## A COOL ENERGY PROTEIN AND OIL SUPPLEMENT FOR HORSES

Equine**POWER** is a blend of top quality energy and protein ingredients that satisfies the demands of your horse. Our unique blend ensures your horse receives cool energy to maximize performance and reproduction and improve your horse's appearance.

We have developed a unique blend that includes :

**Canola** - high in oil and protein

**Flax** - a rich source of lignan and Omega-3 fatty acids

**Alfalfa** - highly palatable and an excellent fibre and protein source

## BENEFITS TO YOUR HORSE

The protein in Equine**POWER** will help build and maintain strong muscle and reproductive functions.

Our concentrated energy blend - required for maintenance, growth and all body functions - helps reduce feed costs.

The oil provides energy, and promotes the development of a healthy, shiny coat.

By using flax, we access the oil containing high levels of Omega-3 fatty acids to provide an extensive range of health benefits to your horse.

## PROCESSED FOR PERFORMANCE

The real advantage of Equine**POWER** comes through our unique, patented, dry extrusion process.

We enhance our ingredient blend by running it through a process to expose the feed to controlled heat and pressure. This ruptures the nutrient cells, allowing digestive enzymes greater access and improving digestibility.

Extrusion also helps control the texture and density of the product, making it easy to handle, and enhancing the palatability for your horse.

We further enhance the quality and freshness of Equine**POWER** by adding an antioxidant, prolonging its shelf life.

## NUTRITIONAL ANALYSIS

Our products have been tested extensively by reputable, external laboratories, and we are fully committed to providing the highest quality product to our customers.

### GUARANTEED ANALYSIS

Crude Protein (min)	17.5%
Crude Fat (max)	28%
Crude Fibre (max)	17%
Fluorine (max)	2 mg/kg
Moisture (max)	5.0%

There are no added vitamins, minerals or salt.
